EXPERIENCE

Web Development

Developed and maintained dynamic web applications using Laravel.

- Collaborated with cross-functional teams to enhance user experience and optimize application performance.
- Leveraged Bootstrap, Sass, and Tailwind to create visually appealing and responsive interfaces.
- Contributed to back-end development using PHP and Laravel, ensuring robust functionality.
- Implemented efficient MySQL database structures for streamlined data management.
- Resolved complex technical issues through systematic problem-solving methods.

Projectname	Description
CXS	A comprehensive website built with fundamental HTML, CSS, and JavaScript
Rome International	Crafted with high-quality design, our multipage web application utilizes the power of Bootstrap 5 and JavaScript to deliver a seamless user experience.
PEAK LINK Full-time	As a Full Stack Web Developer, I design and implement dynamic web applications from concept to deployment. My expertise lies in building robust and scalable solutions using Laravel and PHP. I manage both front-end and back-end development, ensuring seamless integration, functionality, and user experience. My role includes database design, API development, and optimizing performance to deliver high-quality applications. Additionally, I collaborate with cross-functional teams to meet business requirements and enhance operational efficiency.

EDUCATION

Damascus University

Communications engineering

SUMMARY

Experienced web developer skilled in JavaScript, PHP, and Laravel, proficiently delivering dynamic web applications. Expertise in UI frameworks like Bootstrap, Sass, and Tailwind. Adept with a problem-solving mindset to unravel complexities and drive innovative solutions. Committed to continuous growth in the dynamic realm of web development.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, PHP.
- **Front-End Development:** React.js, HTML, CSS.
- **Back-End Development:** Laravel.
- **UI Frameworks:** Bootstrap , Sass, Tailwind CSS.
- **Database Management:** MySQL.
- **Version Control:** Github .
- **Problem-Solving:** Troubleshooting and Debugging.
- **Web Development Tools:** Visual Studio Code, Chrome DevTools.
